Subject: Microsoft Antitrust Case

To whom it may concern,

Please be aware that while the economy is a major concern right now, tomorrow will be another day, and the decisions of today will have to be lived with for a very long time.

Being concerned about terrorism is everybody's business, as is this antitrust case, whether one is an American or not. This is an issue of worldwide concern. And while the world is at war against terrorism, standing shoulder to shoulder with Americans in this time of crisis, America is busy giving world domination to Microsoft on a platter! Don't be under any delusions, this is exactly what is proposed by the recent settlement of the antitrust case and the world is watching in disbelief!

Please understand that the US government has a responsibility to the whole world on this issue, and more than just the domestic economy of today needs to be considered.

This behemoth (Microsoft Corporation) of industrial/commercial terrorism needs to be brought to justice just as assuredly as Osama bin Laden.

Please do the right thing.

Regards,
